SURVEILLANCE INTELLIGENCE EVIDENCE

142 orders placed and cancelled in 240ms. Price pressure was created on Sell book.

COMPLIANCE EVALUATION & ANALYSIS

A high-severity algorithmic trading pattern was detected by the surveillance analyzer on the Indian Stock Exchange feed. The activity profile indicates rapid cancel-to-fill ratios, excessive depth manipulation at multiple order book levels, and artificial order book pressure intended to manipulate the reference price. The trader profile and routing signatures have been logged and compiled in this audit trail for regulatory submission.
